Transforming Operational Complexity into Simplicity.

Where Strategy Meets Execution

Powered by Automation and AI

Saron Solutions is an embedded operations partner, not a traditional consultancy. From operational excellence to IT and project delivery, Saron integrates directly into your team to optimize execution, simplify complexity, and drive measurable outcomes.

What sets Saron apart?

- Combines business acumen with automation and AI to modernize core operations
- Delivers operational excellence through process redesign, KPI frameworks, and managed services
- Aligns and executes strategic initiatives through structured PMO and expert project management
- Future-proofs IT environments through optimization, cybersecurity, and automation

What We Deliver

Fully Executed. Not Just Advised.

Operational Excellence

We turn operational chaos into clarity.

- Strategy alignment, OKRs, and KPI tracking
- Process redesign & business process automation (BPA)
- Change management and 30/60/90-day execution plans
- Quality assurance and regulatory compliance
- Fully managed administrative services (payroll, invoicing, DPO)

Results: Up to 30% increase in efficiency, 25% improvement in customer satisfaction, and full real-time visibility across your operations.

Up to 30% increase in efficiency

25% improvement in customer satisfaction

Full real-time visibility across your operations

Project Management & PMO

Build a smarter, faster, and more structured project delivery engine.

- Establishment of supportive, controlling, or directive PMOs
- Certified PMs and project specialists embedded in your team
- Strategic portfolio oversight and execution governance
- Standar dized methodology and documentation frameworks

Results: 40% faster project delivery, 35% higher project success rate, and 25% reduction in project costs.

40% faster project delivery

35% higher project success rate

25% reduction in project costs

What We Deliver

Fully Executed. Not Just Advised.

IT Optimization & Cybersecurity

Turn IT into a competitive advantage.

- IT infrastructure assessments & cloud migration
- Licensing optimization and onboarding automation
- Cybersecurity risk assessments and ISO/NIST/GDPR compliance
- Microsoft 365 deployment & modern workplace tools (Teams, SharePoint, Power Automate)
- 24/7 IT support and managed services

Results: Up to 50% reduction in IT spend, 35% boost in productivity, and a secure, scalable digital backbone.

Up to 50% reduction in IT spend

35% boost in productivity

Secure and scalable digital backbone

ESG Embedded by Design

We help clients integrate ESG principles in a practical and non-intrusive way. From ESG policies and documentation to reporting and internal workflows, we make it easy to communicate your sustainability commitments.

What Our Clients Say

Fully Executed. Not Just Advised.

"One of the most significant achievements of Saron Management Solutions was their ability to seamlessly become a part of our organization. They cultivated a sense of belonging and ownership that transcended the typical consultant-client relationship. Their team was viewed not as outsiders, but as integral members of our own team, a testament to their interpersonal and professional skills. This profound integration facilitated a more open, collaborative, and productive working environment, fostering innovation and efficiency at every level of project management."

— Wouter Van den Brande, Sidra Medicine COO

"Saron Management Solutions demonstrated an extraordinary commitment to understanding the unique aspects of our business. Their meticulous analysis of our operations identified opportunities for improvement, leading to actionable recommendations that have significantly improved our performance. I most strongly recommend their services to any organization looking to optimize business performance and enhance project management practices. Their contributions have been a differentiator."

— Alex Janzen OBE, RMI Global Solutions COO

Let's Talk Execution

Ready to unlock measurable impact in your organization? Whether you're looking to automate operations, deliver complex projects, or build a resilient IT environment, we're ready to execute.
